The Lies They Tell Tuvia Tenenbom 2017 Who are the real Americans, the people who make up America? In The Lies They Tell Tuvia travels through America to find out. He wanders across borders, partisan lines and socioeconomic boundaries in his fearless quest for the flesh-and-blood American. He visits black ghettos and white gated communities, mega churches and Indian reservations. He schmoozers with robbers who teach him the true meaning of love and meets Jews who dedicate day and night to hatred of the their brethren. He finagles his way into a prison where skinheads pray, experiments with drugs on American streets and ponders the deeper meaning of life with rednecks. Soldiers teach him how to invade foreign countries and intellectuals reveal the beautiful nature of Mother Earth, the goodness of man, and the sadism of the Israeli. The characters he encounters, the adventures he eagerly embraces and the findings of his journey are unique and often unexpected. Welcome to the real America, a place you call home but don't know yet.

Queer Palestine and the Empire of Critique Sa'ed Atshan 2020-05-26 From Ramallah to New York, Tel Aviv to Porto Alegre, people around the world celebrate a formidable, transnational Palestinian LGBTQ social movement. Solidarity with Palestinians has become a salient domain of global queer politics. Yet LGBTQ Palestinians, even as they fight patriarchy and imperialism, are themselves subjected to an "empire of critique" from Israeli and Palestinian institutions, Western academics, journalists and filmmakers, and even fellow activists. Such global criticism has limited growth and led to an emphasis within the movement on anti-imperialism over the struggle against homophobia. With this book, Sa’ed Atshan asks how transnational progressive social movements can balance struggles for liberation along more than one axis. He explores critical junctures in the history of Palestinian LGBTQ activism, revealing the queer Palestinian spirit of agency, defiance, and creativity, in the face of daunting pressures and forces working to constrain it. Queer Palestine and the Empire of Critique explores the necessity of connecting the struggles for Palestinian freedom with the struggle against homophobia.

Born and Raised in a Sect Lois Kendall 2016-11-05 What is it like to grow up in a strict religion or sect? Why did my parents become involved in this group? Why do people stare at me? Born and Raised in a Sect answers many, often unspoken, questions and enables the reader to better grasp what the experience of a sect upbringing and recovery from it may be like. Dr. Kendall is a leading researcher and a passionate advocate of those born and raised in sects. Her book enables the reader to grasp the enormity of the challenges facing this diverse group of people, including - the risks and vulnerabilities associated with maltreatment and abuse - the potential impact on child and adolescent development - socialization and whether or not the child received state schooling - how children and young people come to leave sects and what happens to them afterwards - the practical and emotional challenges they may face, such as stigmatization, loss, trauma, and identity. All of these issues are addressed, and much more. The voice of those born and raised in sects shines through in the pages of this book, especially through the use of quotes from research participants and autobiographies. This book will be of interest to academics and those who support this population, such as loved ones, teachers, clinicians, clergy, or other professionals. Of course, those who might receive the most from reading Born and Raised in a Sect are those who themselves have had this experience. May the words of this book soothe your soul and sharpen your mind.

Race to the Bottom Luke Rosiak 2022-03-08 Everyone wants: High schoolers to graduate well-prepared for jobs. Improved STEM literacy. Greater achievement for inner-city children. Happiness for all children. So why are liberals spending billions of dollars working against those goals? In Race to the Bottom, Luke Rosiak uncovers the shocking reason why American education is failing: Powerful special interest groups are using our kids as guinea pigs in vast ideological experiments. These groups’ initiatives aren’t focused on making children smarter—but on implementing a radical agenda, no matter the effect on academic standards. Nonprofits pump billions into initiatives meant to redress racial inequities. Rather than fixing the problem, districts with a big gap between white and black test scores hire consultants who claim the tests are meaningless because they are “racist.” These consultants’ judgments allow school districts to ignore their own failures—ultimately hurting minority students and perpetuating racism. That is just one example. Drawing on his years in investigative journalism, Rosiak did a deep dive into school files, financial records, and parents’ stories. What he found is that nonprofit groups in the education bureaucracy are “double dip” teaching in-person private classes. Teachers drawing government pay claim it’s unsafe to return to in-person school, but “doubly dip” teaching in-person private classes. And amid all this focus on money and equity, academic standards are crumbling, which hurts American kids in ways we’ll be suffering for decades. Race to the Bottom is the first comprehensive exposé of the way radical ideology and self-serving administrators are destroying academic quality in America’s K-12 schools. Rigorous and deeply-researched, this is essential reading for anyone who cares about the future of our kids.

Iran’s Foreign and Defense Policies Kenneth Katzman 2019-08-03 While Iran's foreign and defense policies are the product of many overlapping and sometimes competing factors such as the ideology of Iran's Islamic revolution, perception of threats to the regime and to the country, long-standing national interests, and the interaction of the Iranian regime's factions and constituencies, Iran's leadership: * Seeks to deter or thwart U.S. or other efforts to invade or intimidate Iran or to bring about a change of regime. * Has sought to take advantage of opportunities of regional conflicts to overturn a power structure in the Middle East that it asserts favors the United States, Israel, Saudi Arabia, and other Sunni Muslim Arab regimes. * Seeks to enhance its international prestige and restore a sense of “greatness” reminiscent of ancient Persian empires. * Advances its foreign policy goals, in part by providing material support to regional allied governments and...

provides a strong survey of the cutting-edge research in the field of intelligence studies: Part I: The evolution of intelligence studies; Part II: Abstract approaches to intelligence; Part III: Historical approaches to intelligence; Part IV: Systems of intelligence; Part V: Contemporary challenges. With a broad focus on the origins, practices and nature of intelligence, the book not only addresses classical issues, but also examines topics of recent interest in security studies. The overarching aim is to reveal the rich tapestry of intelligence studies in both a sophisticated and accessible way. This Companion will be essential reading for students of intelligence studies and strategic studies, and highly recommended for students of defence studies, foreign policy, Cold War studies, diplomacy and international relations in general.

My Short-Lived Life at Being Perfect Brenda Thornlow 2016-05-17 Brenda Thornlow shares her story of being raised a third-generation member of the Jehovah’s Witness faith, and of her attempt to fix her own family conflict with anyone outside of her faith. From a young age, she struggles to accept what her devout family believes, to no avail. Eventually marrying an abusive member with a position of authority in her church, Brenda struggles to extricate herself from this dominating religious group who attempt to manipulate her into staying married to her abuser.

Russia's Border Wars and Frozen Conflicts James J. Coyle 2017-07-03 This book examines the origins and execution of Russian military and political activities in Moldova, Georgia, Ukraine, and Azerbaijan. Using a realist perspective, the author concludes that there are substantial similarities in the four case studies: Russian support to nationalist movements, conflict, Russia's motivation as peacekeepers, Russian control over the diplomatic process to prevent resolution of the conflict, and a perpetuation of Russian presence in the area. The author places the conflicts in the context of international law and nationalism theory.

Transforming U.S. Intelligence Jennifer E. Sims 2005-08-24 The intelligence failures exposed in the wake of 9/11 have made one thing perfectly clear: change is needed in how the U.S. intelligence community operates. Transforming U.S. Intelligence argues that transforming intelligence requires as much a look to the future as to the past and a focus more on the art and practice of intelligence rather than on its bureaucratic arrangements. In fact, while the recent restructuring, including the creation of the Department of Homeland Security, may solve some problems, it has also created new ones. The authors of this volume agree that transforming policies and practices will be the most effective way to tackle future challenges facing the nation's security. This volume's contributors, who have served in intelligence agencies, the Departments of State or Defense, and the staffs of congressional oversight committees, bring their experience as insiders to bear in thoughtful and thought-provoking essays that address what such an overhaul of the system will require. In the first section, contributors discuss twenty-first-century security challenges and how the intelligence community can successfully defend U.S. national interests. The second section focuses on new technologies and modified policies that can increase the effectiveness of intelligence gathering and analysis. Finally, contributors consider management procedures that ensure the implementation of enhanced capabilities in practice. Transforming U.S. Intelligence supports the mandate of the new director of national intelligence by offering both careful analysis of existing strengths and weaknesses in U.S. intelligence as well as practical recommendations for both fixing current problems and improving its strengths. These recommendations, based on intimate knowledge of the way U.S. intelligence actually works, include suggestions for the creative mixing of technologies with new missions to bring about the transformation of U.S. intelligence without incurring unnecessary harm or expense. The goal is the creation of an intelligence community that can rapidly respond to developments in international politics, such as the emergence of nimble terrorist networks while reconciling national security requirements with the rights and liberties of American citizens.

The Unarmed Truth John Dodson 2013-12-03 A hard-hitting inside account of the Fast and Furious scandal—the government-sponsored program intended to “win the drug war” by providing and tracking gun sales across the border to Mexico—from whistle-blower and ATF agent John Dodson. After the terror attacks of September 11, 2001, John Dodson pulled bodies out of the wreckage at the Pentagon. In 2007, following the shooting massacre at Virginia Tech, John Dodson walked through the classrooms, heartbroken, to cover up the bodies of the victims. Then came Arizona. The American border. Ten days before Christmas, 2010, ATF agent John Dodson awoke to the news he had dreaded every day as a member of the elite team called the Group VII Strike Force: a U.S. border patrol agent named Brian Terry had been shot dead by bandits armed with guns that had been supplied to them by ATF. Was this an inevitable consequence of the Obama administration’s Project Gunrunner, set in place one year earlier ostensibly to track Mexican drug cartels? Brian Terry’s murder would not only change John Dodson’s life forever; it would reveal a scandal so unthinkably unpatriotic that it forced President Barack Obama to claim executive privilege and caused Attorney General Eric Holder to be held in contempt of Congress. Federal Agent John Dodson, an ex-military man, took an oath to defend the world’s greatest country, and proudly considered himself a walking patriotic example of the American Dream. Brian Terry, ex-military like Dodson, was only forty years old, a family man who served his country by working for the government. Dodson was terrified when the next phone call came, one with the potential to destroy his own life. As a former CBS Los Angeles investigative journalist Sharyl Attkisson asked Dodson to go public with what he knew about Fast and Furious. To the family of Agent Terry, it was a chance to save lives and right a wrong. As he took a fight to the border towns of Arizona to a showdown in the halls of Congress, John Dodson clung to the hope that truth would prevail, that he would be redeemed, and that Brian Terry’s death would not be in vain. Like whistle-blowers before him, John would not be welcome back on the job. But he found strength in his
conscience, in the support of the American public, and in Senators Darryl Isa and Chuck Grassley. When his first-amendment rights to publicly tell his story were threatened, the ACLU took up his case. For her report revealing John Dodson as the key whistle-blower in Fast and Furious, Sharyl Attkisson received an Emmy Award for Outstanding Investigative Journalism. Ultimately, John Dodson was cleared by the Inspector General’s office, publicly heralded as a hero, and returned to Arizona. Perhaps a lesson gleaned from John Dodson’s powerful account is well stated by former Speaker of the House of Representatives Sam Rayburn: “If you always tell the truth, you don’t have to remember what you said.”

**The Al-Qaeda Organization and the Islamic State Organization**

Paul Kamolnick 2017-02-12 The al-Qaeda Organization (AQO) and the Islamic State Organization (ISO) are transnational adversaries that conduct terrorism in the name of Sunni Islam. It is declared U.S. Government (USG) policy to degrade, defeat, and destroy them. This book has been written to assist willing military planners, strategists, and professional military educators whose mission demands a deep understanding of strategically-relevant differences between these two transnational terrorist entities. In it, one shall find a careful comparative analysis across three key strategically relevant dimensions: essential doctrine, beliefs, and worldview; strategic concept, including terrorist modus operandi; and specific implications and recommendations for current USG policy and strategy. Key questions that are addressed include: How is each terrorist entity related historically and doctrinally to the broader phenomenon of transnational Sunni “jihadism”? What is the exact nature of the ISO? How, if at all, does ISO differ in strategically relevant ways from AQO? What doctrinal differences essentially define these entities? How does each understand and operationalize strategy? What critical requirements and vulnerabilities characterize each entity? Finally, what implications, recommendations, and proposals are advanced that are of particular interest to USG strategists and professional military educators?

**The Politics of Policing in Greater China**

Sonny Shiu-Hing Lo 2016-11-21 This book examines the politics of policing in Greater China, including mainland China, Taiwan, Hong Kong, and Macao. As the author shows, police ideological indoctrination is strongest in mainland China, followed by Hong Kong, and Taiwan, where the police is under increasing political stress, in the aftermath of rising public protests and socio-political movements. Macao’s police, on the other hand, is far less politicized and indoctrinated than their mainland Chinese counterpart. This book demonstrates that policing in China is a distinctive and extensive topic, as it involves not only crime control, but also crisis management and protest control, governance and corruption (or anti-corruption), the management of customs and immigration, the control over legal and illegal migrants, the transfer of criminals and extradition, and intergovernmental police cooperation and coordination. As economic integration is increasing rapidly in Greater China, this region’s policing deserves special attention.

**Learning from the Secret Past**

Robert Dover 2011-11-04 Identifying “lessons learned” is not new—the military has been doing it for decades. However, members of the worldwide intelligence community have been slow to extract wider lessons gathered from the past and apply them to contemporary challenges. Learning from the Secret Past is a collection of ten carefully selected cases from post-World War II British intelligence history. Some of the cases include the Malayan Emergency, the Cuban Missile Crisis, Northern Ireland, and the lead up to the Iraq War. Each case, accompanied by authentic documents, illuminates important lessons that today’s intelligence officers and policymakers—in Britain and elsewhere—should heed. Written by former and current intelligence officers, high-ranking government officials, and scholars, the case studies in this book detail intelligence successes and failures, discuss effective structuring of the intelligence community, examine the effective use of intelligence in counterinsurgency, explore the ethical dilemmas and practical gains of interrogation, and highlight the value of human intelligence and the dangers of the politicization of intelligence. The lessons learned from this book stress the value of past experience and point the way toward running effective intelligence agencies in a democratic society. Scholars and professionals worldwide who specialize in intelligence, defense and security studies, and international relations will find this book to be extremely valuable.

**The Art of Intelligence**

Henry A. Crumpton 2013-04-30 “A lively account . . . combines the derring-do of old-fashioned spycraft with thoughtful meditations on the future of intelligence,” the New York Times declared. With rare and revelatory access to the CIA and the Washington Post “Offer[s] an exceptionally deep glimpse into the CIA’s counterterrorism operations in the last decade of the twentieth century.” —Harper’s A legendary CIA spy and counterterrorism expert tells the spellbinding story of his high-risk, action-packed career Revelatory and groundbreaking, The Art of Intelligence will change the way people view the CIA, domestic and foreign intelligence, and international terrorism. Henry A. “Hank” Crumpton, a twenty-four-year veteran of the CIA’s Clandestine Service, offers a thrilling account that delivers profound lessons about what it means to serve as an honorable spy. From CIA recruiting missions in Africa to pioneering new programs like the UAV Predator, from running post-9/11 missions in Afghanistan to heading up all clandestine CIA operations in the United States, Crumpton chronicles his role in the battlefield and in the Oval Office—in transforming the way America wages war and sheds light on issues of domestic espionage.

**A Bull in China**

Jim Rogers 2014-10-09 Profiting from China without getting burned is currently an obsession with the international investment community. The estimated size of the Chinese economy has just been revised upwards, making it the 4th largest in the world behind the US, Japan and Germany, and ahead of the UK but the idea that investing in China is a sure-fire, get-rich-quick investment story is dangerously misleading. The author of the bestselling Investment Biker, AdventureCapitalist, and Hot Commodities, is providing a book that provides a window into what will soon be the most liquid, most liquid, most liquid of our time: China. * As the Chinese economy has had an annual average growth of 9.4percent since 1978, and despite the ongoing speculation about China’s future, its stock market is now emerging from a six-yearlow. * As the Chinese economy continues to lumber toward a free marketsystem - and as the Chinese government inevitably unpegs itscurrency and opens its stock market to more foreign investment,Rogers foresees an abundance of opportunities for investors. * In this book, he shows
reader not only how to take advantage of China’s coming dominance - what, where, how, and when to buy - but how China will impact individual companies, markets, and economies around the world. * "Nobody with blue eyes has ever made money investing in China," the old saying goes. Jim Rogers aims to disprove this adage. Jim Rogers co-founded the Quantum Fund and retired at age 37. Since then, he has served as a sometime professor of finance at Columbia University’s business school, and as a media commentator. He appears twice a week on Fox Business News, and is the author of three immensely successful books.

Dark Age America John Michael Greer 2016-08-15 The climate futurist presents a sobering analysis of America’s future in the face of climate change—and how we can prepare to make the most of it. After decades of missed opportunities, the door to a sustainable future has closed, and the future we face now is one in which today’s industrial civilization unravels in the face of uncontrolled climate change. What is the world going to look like when all these changes have run their course? John Michael Greer seeks to answer this question, using a clear-eyed analysis of ecology, economics, and history to discern what the next 500 years or so might look like. As globalization ends, the United States—and Western civilization—will enter the stages of decline and fall. Though Dark Age America offers an uncompromising assessment of our collective future, it is by no means without hope. Knowing where we’re headed is a crucial step in responding to the challenges of the future and doing what we can now to help our descendants make the most of the world we’re leaving them.

United States and Soviet Special Operations John M. Collins 1987 Terrorists Use the Internet Chapter 7-06-02 Terrorist use of the Internet has become a focus of media, policy, and scholarly attention in recent years. Terrorists use the Internet in a variety of ways, the most important being for propaganda purposes and operations-related content, but the Internet is also potentially a means or target of attack. This book presents revised versions of a selection of papers delivered at the NATO Advanced Research Workshop (ARW) on 'Terrorists' Use of the Internet' held in Dublin, Ireland in June 2016. One aim of the workshop was to nurture dialogue between members of the academic, policy and practitioner communities, so the 60 delegates from 13 countries who attended the workshop included representatives from each of these. The participants encompassed a wide range of expertise (including engineering, computer science, law, criminology, political science, international relations, history, and linguistics) and the chapters contained herein reflect these diverse professional and disciplinary backgrounds. The workshop also aimed to address the convergence of threats. Following an introduction which provides an overview of the various ways in which terrorists use the Internet, the book’s remaining 25 chapters are grouped into 5 sections on cyber terrorism and critical infrastructure protection; cyber-enabled terrorist financing; jihadi online propaganda; online counterterrorism; and innovative approaches and responses. The book will be of interest to all those who need to maintain an awareness of the ways in which terrorists use the Internet and require useful techniques into how to response to this use can be countered.

Illuminating Tomorrow’s War Martin C. Libicki 1999 Considers how the information revolution is creating a revolution in military affairs that will fundamentally change the way U.S. forces fight . . . supported by a system of systems that will give U.S. forces superior battlespace awareness. Chapters: precision-guided munitions; precision location; a world of sensors; the potential proliferation of the revolution in military affairs; standoff warfare; coalition structures; prospects for the grid; defining the grid; knowledge maintenance; access; security; difficulties of top-down integration; cutting to the core; planning, experimentation, & technology development; & opportunities for bottom-up integration.

The History of Terrorism Gérard Chaliand 2016-08-23 This authoritative work provides an essential perspective on terrorism by offering a rare opportunity for analysis and reflection at a time of ongoing violence, threats, and reprisals. Some of the best international specialists on the subject examine terrorism’s complex history from antiquity to the present day and find that terror, long the weapon of the weak against the strong, is a tactic as old as warfare itself. Beginning with the Zealots of the first century CE, contributors go on to discuss the Assassins of the Middle Ages, the 1789 Terror movement in Europe, Bolshevik terrorism during the Russian Revolution, Stalinism, “resistance” terrorism during World War II, and Latin American revolutionary movements of the late 1960s. Finally, they consider the emergence of modern transnational terrorism, focusing on the roots of Islamic terrorism, al Qaeda, and the contemporary suicide martyr. Along the way, they provide a groundbreaking analysis of how terrorism has been perceived throughout history. What becomes powerfully clear is that only through deeper understanding can we fully grasp the present dangers of a phenomenon whose repercussions are far from over. This updated edition includes a new chapter covering the 2001-2002 war on terror.
